

Hello, my name is

I would like to suggest that transport as supplied for medical specialist and certain other medical appointments be extended. This extension of service to cover all medical appointments including General Practice, optical, dental and physio therapy etc.

I feel consideration for this submission should given in particular for Veterans that reside in rural areas at least. Under normal circumstances attending any appointment outside what is now legislated can cause out of pocket expenses of at least \$280.00. There are other reasons concerning myself and I'm sure others.

Respectfully submitted for your consideration.

Thank you for your ongoing help and support.

Regards
