---

Dear Sir / Madam.

I thank you for the most recent update on the Proposed Legislation reform to address the incidences of Veteran suicides, I have also experienced the trauma of losing a family member to this ongoing problem, Being My brother, also a Veteran, I believe some of the changes will benefit most Veterans, but in My case under DRCA I will still be disadvantaged because according to the productivity commission a gold card will not be extended to veterans under the DRCA.

even if the individual has acquired the necessary impairment points going forward with the new and improved Legislation reform, I believe it should be an automatic acceptance to individuals with higher levels of impairment I just adds to more disappointment and frustration to these Veterans who have already been disadvantaged by the DRCA .

Whilst the new legislation reform may help save lives in the long-term( One can only hope, ) veterans under the DRCA should not be disadvantaged as in the past. Thanking you
