

VETs HeLP: Veterans Healthcare eLearning Platform

The Department of Veterans' Affairs has partnered with medical education company Medcast to deliver **VETs HeLP** – an online health education platform for health professionals.

VETs HeLP provides health professionals with easy access to free resources and courses that support delivery of high-quality care to veterans, topics include:

- the veteran experience and transition to civilian life
- mental health
- services available for veterans and their families
- how to bill for care provided to veterans; and
- compensation and claims processing.

Many veterans face barriers in accessing healthcare.

VETs HeLP equips health professionals to address the unique health needs of veterans.

Facilitators with experience in veteran healthcare will guide health professionals through case studies and interactive sessions to deepen their understanding of the needs and challenges faced by veterans and their families, outlining the supports available through DVA and other organisations.
